

## Strategy: Technology in Teaching and Learning

Technology in Teaching and Learning can be as simple as using the vast repository of the web. Taking the time to know what sites are useful to your teaching can help you plan, assess, and develop activities.

## Origin

Cordell, R. (2011, May 8). New technologies to get your students engaged. *The Chronicle of Higher Education*. Retrieved from <http://chronicle.com/article/New-Technologies-to-Get-Your/127394/>.

## Application

**The Internet Archive** (a non-profit Internet Library) <http://www.archive.org/> is a digital archive of web-based information that includes the *Wayback Machine*, a historical archive (back to 1996) of over 150 billion web pages.

**Chronicling America** (National Endowment for the Humanities) <http://chroniclingamerica.loc.gov/> is a digitized newspaper directory which includes the *100 Years Ago Today* collection, a daily link to the front pages of American newspapers from 100 years before.

**Google Art Project** (Google) <http://www.googleartproject.com/> is a partnership with 17 (and growing) museums to provide a digital display of artwork around the world.

**Hathi Trust Digital Library** <http://www.hathitrust.org/home> is a partnership of over 50 major research institutions and libraries to share information in a digital form.

**Making of America** (Cornell University and University of Michigan) <http://digital.library.cornell.edu/m/moa/> and <http://quod.lib.umich.edu/m/moagrp/> is a digital library of primary sources in American history, literature, and culture.

## Reflection

- What are some of your “go-to” sites for course content, assignments, and/or activities?
  
  
  
  
  
  
  
  
  
  
- How could you include one of these sites in your course?
